

Date: October 21, 2014

Name of Product: Activity Insight from Digital Measures

Contact for more Information: Kristin Kleinhans, (414) 238-6205, kkleinhans@digitalmeasures.com

Section 1194.22 Web-based Internet information and applications – Detail

VPAT™

Voluntary Product Accessibility Template®

<i>Criteria</i>	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	All	All images include standards-compliant alternate text.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	N/A	Digital Measures does not supply multimedia content. Clients and users may upload multimedia content and are free to provide alternate accessible content.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	All	Color may be used to visually separate records, or to indicate record state (enabled, disabled, etc). When color is used to represent record state, alternate text is provided.
(d) Documents shall be organized so they are readable without requiring	All	Style sheets are used to enhance visual presentation, but are not required for accessibility.

an associated style sheet.		
(e) Redundant text links shall be provided for each active region of a server-side image map.	N/A	No server-side image maps are used.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	N/A	No client-side image maps are used.
(g) Row and column headers shall be identified for data tables.	All	Row and column header markup is consistently used throughout the site.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	All	Complex or nested data entry screens use hidden label text to provide appropriate context for each field.
(i) Frames shall be titled with text that facilitates frame identification and navigation	N/A	No frames are used.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	N/A	Digital Measures does not supply animations or other multimedia content, nor create pages that induce flickering. Clients and users may upload content that may break this restriction, however.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	N/A	All end-user functionality is fully tested for accessibility; as such, no special text-only pages are included.

<p>(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.</p>	<p>All</p>	<p>All end-user scripted content is designed and tested for accessibility and/or Assistive Technology. Some administrative screens may use advanced scripting features that may not compatible with all Assistive Technologies.</p>
<p>(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).</p>	<p>N/A</p>	<p>No applets, plug-ins, or other applications are required.</p>
<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>All</p>	<p>All forms are designed and tested for accessibility and/or Assistive Technology, with appropriate field labels providing extended context.</p>
<p>(o) A method shall be provided that permits users to skip repetitive navigation links.</p>	<p>N/A</p>	<p>No repetitive navigation links exist.</p>
<p>(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.</p>	<p>All</p>	<p>Sessions time-out after 90 minutes, and the user is prompted five minutes prior to session time-out.</p>
