

**VPAT™ (Voluntary Product Accessibility Template®)**  
**Version 1.3**

The purpose of the **Voluntary Product Accessibility Template**, or **VPAT™**, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial “Electronic and Information Technology” products and services with features that support accessibility. It is assumed and recommended that offerers will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., “equivalent facilitation.” The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

**Date:** 2/25/15

**Name of Product:** Mediasite Search 7.x by Sonic Foundry (on non-mobile devices)

**Version 1.3**

**Section 1194.21 Software Applications and Operating Systems – Detail**

<i>Criteria</i>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supported with exceptions  The core functionality of Mediasite Search is accessible via a keyboard, and all functions and results can be discerned textually.	There are clickable elements that require the use of a mouse to navigate.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supported  Mediasite Search requires the use of a web browser, and does not use any keyboard shortcuts outside of what the user's browser supports. Mediasite Search's does not interfere with any accessibility features presented by any other product or operating system.	If it is determined that Mediasite Search interferes with any product or operating system's accessibility features, an issue can be filed with Sonic Foundry's Technical Services department. Sonic Foundry will evaluate the issue and fix if possible and appropriate.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Supported with exceptions  Mediasite Search provides some on-screen indication of the current focus and tracking of same throughout the software. However, Mediasite does not support Microsoft Active Accessibility (MSAA).	
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Supported with exceptions  When used with a screen reader, most Mediasite Search elements are identified and available to Assistive Technology.	The state of presentations are conveyed by bitmaps, and not available to screen readers. Presentations that have not begun also have bitmap indicators for

**VPAT™ (Voluntary Product Accessibility Template®)**  
**Version 1.3**

		status that are not conveyed with text.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supported  Mediasite Search uses standard and consistent images throughout its applications.	
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Supported with minor exceptions  Mediasite Search uses standard system functions to send textual information to the operating system in most cases.	
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Supported  Mediasite Search does not override the user selected contrast and color selections and other individual display attributes.	
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Not Applicable	
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Supported	
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Not Applicable	
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supported	
(l) When electronic forms are used, the form shall allow people using Assistive Technology	Supported	

**VPAT™ (Voluntary Product Accessibility Template®)**  
**Version 1.3**

to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.		
---	--	--

**Section 1194.22 Web-based Internet information and applications – Detail**

<i>Criteria</i>	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Not supported	Mediasite Search does not have a text equivalent for presentation status for returned results. Users would have to select the presentation to discover the status.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not Applicable	
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supported	
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Not supported	
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not applicable	
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not applicable	
(g) Row and column headers shall be identified for data tables.	Not supported	
(h) Markup shall be used to associate data cells and header cells for data tables that	Not supported	

**VPAT™ (Voluntary Product Accessibility Template®)**  
**Version 1.3**

have two or more logical levels of row or column headers.		
(i) Frames shall be titled with text that facilitates frame identification and navigation	Not supported	
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supported	
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Not supported	
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Not supported	
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	Supported	We provide a linked button to download the plug-in if necessary.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Not supported	
(o) A method shall be provided that permits users to skip repetitive navigation links.	Not applicable	
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not applicable	

**VPAT™ (Voluntary Product Accessibility Template®)**  
**Version 1.3**

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.

**Section 1194.31 Functional Performance Criteria – Detail**

<i>Criteria</i>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Supported	Supported via screen readers.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Supported	Screen readers, and third-party Assistive Technology like browser zooming can also be used.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Supported  All modes of operation and information retrieval within Mediasite Search do not require hearing.	
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Not applicable	
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Not applicable	
(f) At least one mode of operation and information retrieval that does not require	Not supported	There are some elements within

**VPAT™ (Voluntary Product Accessibility Template®)**

**Section 1194.41 Information, Documentation and Support – Detail**

<i>Criteria</i>	Supporting Features	Remarks and explanations
<p>(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge</p>	<p>Supported with exceptions</p>	<p>End users (viewers) of content created by Mediasite are not supported. Beyond our documentation, end users of Mediasite Recorders and the Mediasite Enterprise Video Platform who have a support contract with Sonic Foundry can receive auditory help by calling our Tech Support phone number.</p>
<p>(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.</p>	<p>Supported with exceptions</p>	<p>End users (viewers) of content created by Mediasite are not supported. End users of Mediasite Recorders and the Mediasite Enterprise Video Platform platform who have a support contract with Sonic Foundry can receive auditory help by calling our Tech Support phone number. A technical planner on accessibility is also available in text format.</p>
<p>(c) Support services for products shall accommodate the communication needs of end-users with disabilities.</p>	<p>Supported with exceptions</p>	<p>Customers under a support contract have multiple means of communicating with Sonic Foundry support staff including email or phone. A searchable knowledge base of online articles is also available.</p>
