McAfee®

Voluntary Product Accessibility Template (VPAT™)

Name of Product: McAfee Virus Scan Enterprise (VSE) 8.8.0
Date: April 13, 2011 – Rev A
Contact for additional Information:
    Name: Maris Bergmanis
    Phone: 651-628-2735
    E-mail:maris_bergmanis@mcafee.com

The first table of the Template provides a summary view of the section 508 standards. The subsequent tables provide detailed views of each subsection. There are three columns in each table.
  In the Summary Table:
- Column one describes the subsections of subparts B and C of the standards.
- Column two describes the supporting features of the product or refers to the corresponding detailed tables
- Column three contains any additional remarks and explanations regarding the product.

  In the subsequent tables:
- Column one contains the lettered paragraphs of the subsections.
- Column two describes the supporting features of the product with regard to that paragraph.
- Column three contains any additional remarks and explanations regarding the product.

Summary Table

Criteria	Supporting Features	Explanations
Section 1194.21 Software Applications and Operating Systems	Please refer to the attached VPAT.	
Section 1194.22 Web-based internet information and applications	Not Applicable	Not a web based Internet information app.
Section 1194.23 Telecommunications Products	Not Applicable	Not a telecommunications product
Section 1194.24 Video and Multi-media Products	Not Applicable	Not a video or multimedia product
Section 1194.25 Self-Contained, Closed Products	Not Applicable	Not a self-contained or closed product
Section 1194.26 Desktop and Portable Computers	Not Applicable	Not a desktop or portable computer product
Section 1194.31 Functional Performance Criteria	Please refer to the attached VPAT.	

Section 1194.21 Software Applications and Operating Systems

Criteria	Supporting Features	Explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supported with exceptions.	Product is designed to function using both keyboard and mouse controls.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supported	Product does not interfere or explicitly disrupt or disable accessibility features of other products or the operating system.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Supported	Product provides a well-defined on-screen indication of current focus.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Supported	Product uses labels in close proximity to the field.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supported.	The product makes every effort to ensure consistent use of icons and controls.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text	Supported with exceptions.	Not all functional areas of the Product use methods that allow output to the screen for speech applications. Product has not been tested recently for screen reader

content, text input caret location, and text attributes.		compatibility.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Supported with exceptions	Icons do not permit user selected color selections.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Supported with one exception.	There is only one animation for indicating running scans. This animation cannot disabled, but can be run in a hidden mode that is invisible to the user.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element	Supported	Product uses controls which supplement color with other visual cues to indicate selection, control status, and response.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Not applicable	Product doesn't permit users to adjust color and contrast settings
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Not applicable	Product does not use flashing or blinking text, objects, or other elements.
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supported	Product uses labels in close proximity to the field.

Section 1194.31 Functional Performance Criteria

Criteria	Supporting Features	Explanations
(a) Vision: At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for assistive technology used by people who are blind or visually impaired shall be provided.	Unknown but believed to be supported	Although untested it is believed that the application supports Accessibility technologies such as screen readers.
(b) Visual acuity: At least one mode of operation and information retrieval that does not require visual acuity great than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for assistive technology used by people who are visually impaired shall be provided.	Supported.	Product works with the magnifier accessibility feature and the high contrast settings of Windows
(c) Hearing: At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for assistive technology used by people who are deaf or hard of hearing shall be provided.	Supported	Hearing is not required for using this Product.
(d)Audio Information: Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Not applicable	Product does not use audio.
(e) Speech: At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for assistive technology used by people with disabilities shall be provided.	Supported	Speech is not required for using this Product.
(f) Motor Skills/Coordination: At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Supported with exceptions	Except for a few cases, product functionality is accessible via normal keyboard and mouse controls.

Section 1194.41 Information, Documentation, and Support

Criteria	Supporting Features	Explanations
Section 1194.41 (a) Product Support Documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supported	Documentation is available in electronic portable document format (PDF).
Section 1194.41 (b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported	Documentation of most accessibility features is available from Microsoft Windows data bases.
1194.41 (c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported.	Technical support is available via telephone, web, and email.
