

Voluntary Product Accessibility Template (VPAT™)

Name of Product: McAfee ePolicy Orchestrator (ePO) 4.6

Date: 4/13/2011- Rev A

Contact for additional Information:

Name: Maris Bergmanis

Phone: 651-628-2735

E-mail: maris_bergmanis@mcafee.com

The first table of the Template provides a summary view of the section 508 standards. The subsequent tables provide detailed views of each subsection. There are three columns in each table.

In the Summary Table:

- Column one describes the subsections of subparts B and C of the standards.
- Column two describes the supporting features of the product or refers to the corresponding detailed tables
- Column three contains any additional remarks and explanations regarding the product.

In the subsequent tables:

- Column one contains the lettered paragraphs of the subsections.
- Column two describes the supporting features of the product with regard to that paragraph.
- Column three contains any additional remarks and explanations regarding the product.

Summary Table

Criteria	Supporting Features	Explanations
Section 1194.21 Software Applications and Operating Systems	Please refer to the attached VPAT.	
Section 1194.22 Web-based internet information and applications	Please refer to the attached VPAT.	
Section 1194.23 Telecommunications Products	Not Applicable	Not a telecommunications product
Section 1194.24 Video and Multi-media Products	Not Applicable	Not a video or multimedia product
Section 1194.25 Self-Contained, Closed Products	Not Applicable	Not a self-contained or closed product
Section 1194.26 Desktop and Portable Computers	Not Applicable	Not a desktop or portable computer product
Section 1194.31 Functional Performance Criteria	Please refer to the attached VPAT.	
Section 1194.41 (a) Information, Documentation and Support	Please refer to the attached VPAT.	

Section 1194.21 Software Applications and Operating Systems

Criteria	Supporting Features	Explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supported with exceptions.	Although the product is designed to function using both keyboard and mouse controls,
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supported	Product does not interfere or explicitly disrupt or disable accessibility features of other products or the operating system.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Supported	Product provides a well-defined on-screen indication of current focus.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Supported	Product uses labels in close proximity to the field.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supported.	The product makes every effort to ensure consistent use of icons and controls.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Supported with exceptions.	Not all functional areas of the Product use methods that allow output to the screen for speech applications.

<p>(g) Applications shall not override user selected contrast and color selections and other individual display attributes.</p>	<p>Supported with exceptions</p>	<p>Portions of the application including configuration management and reports override user selected color selections as relates to branding.</p>
<p>(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.</p>	<p>Not applicable</p>	<p>Application does not use animation.</p>
<p>(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element</p>	<p>Supported</p>	<p>Product uses controls which supplement color with other visual cues to indicate selection, control status, and response.</p>
<p>(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.</p>	<p>Not applicable</p>	<p>Product doesn't permit users to adjust color and contrast settings</p>
<p>(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Supported</p>	<p>Product does not use flashing or blinking text, objects, or other elements.</p>
<p>(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Supported</p>	<p>Product uses labels in close proximity to the field.</p>

Section 1194.22 Web-based Internet Information and Applications

Criteria	Supporting Features	Explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Supported	Product provides alt-tags for images.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not applicable	The product does not use multimedia presentations.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supported	Product uses controls which supplement color with other visual cues to indicate selection, control status, and response.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supported	
(e) Redundant text links shall be provided for each active region of a server-side image map.	Supported	Charts provide legend with redundant text links for active regions of image map used for the chart display.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not applicable	Product does not use server-side image maps.
(g) Row and column headers shall be identified for data tables.	Supported	Tables use column headers. For key-value pair tables row headers are provided.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Supported	Product uses table header designations for most visible tables. Some tables are used for layout purposes only.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Not applicable	Product does not use frames.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supported	Product does not have screens that flicker.

<p>(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.</p>	<p>Not supported</p>	<p>Product does not provide a text-only page with equivalent information or functionality.</p>
<p>(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.</p>	<p>Not supported</p>	<p>Not tested.</p>
<p>(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).</p>	<p>Not applicable</p>	<p>Product does not require applet, plug-in or other application be present on the client system to interpret page content.</p>
<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Unknown.</p>	<p>Untested but believed to be supported.</p>
<p>(o) A method shall be provided that permits users to skip repetitive navigation links.</p>	<p>Not supported</p>	
<p>(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.</p>	<p>Supported.</p>	<p>Product does not use timed responses, but there is a global authentication timeout that will display an alert after a set amount of time.</p>

Section 1194.31 Functional Performance Criteria

Criteria	Supporting Features	Explanations
(a) Vision: At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for assistive technology used by people who are blind or visually impaired shall be provided.	Untested but believed to be supported	Expect that support is provided through accessibility technologies such as screen readers
(b) Visual acuity: At least one mode of operation and information retrieval that does not require visual acuity great than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for assistive technology used by people who are visually impaired shall be provided.	Supported.	Product works with the magnifier accessibility feature and the high contrast settings of Windows
(c) Hearing: At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for assistive technology used by people who are deaf or hard of hearing shall be provided.	Supported	Hearing is not required for using this Product.
(d) Audio Information: Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Not applicable	Product does not use audio.
(e) Speech: At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for assistive technology used by people with disabilities shall be provided.	Supported	Speech is not required for using this Product.
(f) Motor Skills/Coordination: At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Supported with exceptions	All Product functionality is accessible via normal keyboard and mouse controls, including Windows sticky key feature.

Section 1194.41 Information, Documentation, and Support

Criteria	Supporting Features	Explanations
Section 1194.41 (a) Product Support Documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supported	Documentation is available in electronic portable document format (PDF).
Section 1194.41 (b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported	Documentation of most accessibility features is available from Microsoft Windows data bases.
1194.41 (c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported.	Technical support is available via telephone, web, and email.
