

Section 1194.22 Web-based Internet information and applications

* Refer to (<http://www.access-board.gov/sec508/guide/1194.22.htm>) for details on the guidelines listed below.

<i>Criteria</i>	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Supported	There are no known images without ALT tags.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not Applicable	There are no multimedia presentations present
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supported	The application avoids using color to convey information.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supported	We use external style sheets and do not override user-defined style sheets.
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable	We do not use image maps
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not Applicable	We do not use image maps
(g) Row and column headers shall be identified for data tables.	Mostly supported	99% of tables in our primary drug databases (Lexi-Drugs, Drugs Facts & Comparisons, Pediatric Lexi-Drugs, Dental Lexi-Drugs, and Geriatric Lexi-Drugs) have column/row

		headers identified using the <th> tag.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Mostly Supported	99% of tables in our primary drug databases (Lexi-Drugs, Drugs Facts & Comparisons, Pediatric Lexi-Drugs, Dental Lexi-Drugs, and Geriatric Lexi-Drugs) have column/row headers identified using the <th> tag.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Not Applicable	We do not use frames.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supported	We do not use any animation, applets or plug-ins that would create flash or flickering.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Not Applicable	We do not have any text-only pages.
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Supported	
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with 1194.21(a) through (l).	Not Applicable	We do not require an applet, plug-in, or other application to interpret page content.

<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Partially Supported</p>	<p>Site functionality forms are supported. Data driven calculator forms are not supported.</p>
<p>(o) A method shall be provided that permits users to skip repetitive navigation links.</p>	<p>Not Applicable</p>	<p>We do not have any repetitive navigation links.</p>
<p>(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.</p>	<p>Not Applicable</p>	<p>The site doesn't include any timed responses.</p>
